OBJECTIVE

Software Engineer with nearly 3 years of experience developing responsive web applications using React.js and Java-based technologies. Passionate about transitioning into UX/UI design, combining technical expertise with a user-centered mindset to create intuitive, accessible, and engaging digital experiences. Experienced in agile collaboration and delivering solutions that balance user needs with business goals.

EDUCATION

St. Francis College, New York | Master's in Information Technology.

Sept 2025 - Expected

New York Institute of Technology, New York | Master's in Computer Science.

May 2024

REVA University, Bangalore, India | Bachelor's In Computer Science.

May 2020

PROFESSIONAL EXPERIENCE

Ambica Construction and Contractors, Software Engineer (Full-time), Bangalore, India. June 2020 - July 2022

- Engineered full-stack modules in Java, React, and Angular, improving code maintainability and reducing production bugs by 30% across 3 core product features.
- Delivered 15+ sprint features on schedule across 2 years by partnering with product, design, and QA in a Scrum workflow, maintaining a 95%+ sprint completion rate.

Lernov, Web Development Intern (Part-time), Bangalore, India.

July 2021 - August 2021

- Redesigned 5 key UI flows in Figma after conducting user testing, boosting task success rates by 30% and cutting page load time by 15%.
- Built and QA-tested responsive layouts across desktop/mobile, earning 90% stakeholder approval on first review.

Sain Solutions, Website Developer and Designer (Intern), Bangalore, India.

Feb 2020 - May 2020

- Built and redesigned responsive retail interfaces using HTML5, CSS3, JavaScript, and Bootstrap, increasing user interaction by 50% and reducing bounce rate by 25% through user-driven UI improvements.
- Improved backend response time by 40% by optimizing data-handling logic, using Git based version control across a distributed Agile team..

VOLUNTEER EXPERIENCE

9/11 National Memorial & Museum (Volunteer), New York.

Jan 2025 - Present

- Educated 1,000+ visitors monthly through storytelling, tours, and digital programs, fostering cultural understanding of complex historical events.
- Coordinated with visitor experience and operations teams to execute 20+ structured programs and tours.

UPchieve, STEM Computer Science (Volunteer), New York.

Sept 2024 - Dec 2025

- Mentored 15+ high school students in algorithms and data structures, improving technical assessment scores and college readiness.

PROJECTS

Task-Flow Pro - AI-Powered Productivity Companion.

March 2025

- Built an AI-assisted task prioritization engine that streamlined team workflows, driving an 84% improvement in reported productivity across test users.

Gift Genie

February 2025

- Developed an interactive React-based recommendation engine, cutting gift search time by 70% through intelligent filters, increasing return visits by 50%.

Mood-Based Playlist Generator.

January 2025

- Built a JavaScript/NLP web app that auto-generates playlists from user sentiment, increasing engagement by 40% through iterative UI refinement.

ACHIEVEMENTS

Research Paper, International Conference, REVA University, Bangalore, India.

May 2020

Attended conference to display my project and research paper in Advances in Computing and Information Technology (IACIT-2020). Conducted research and presented findings on innovative computing techniques, contributing to the advancement of the field.
