OBJECTIVE

Software Engineer with 2+ years of experience in React.js, and Java-based backend technologies. Proven track record in building responsive, scalable web applications and optimizing performance across the stack. Passionate about creating accessible, user-centered digital experiences in agile environments.

EDUCATION

St. Francis College, New York | Master's in Information Technology.

Sept 2025 - Expected

New York Institute of Technology, New York | Master's in Computer Science.

May 2024

REVA University, Bangalore, India | Bachelor's In Computer Science.

May 2020

PROFESSIONAL EXPERIENCE

Ambica Construction and Contractors, Bangalore, India

June 2020 - July 2022

- Built and enhanced full-stack web modules using Java, Spring Boot, React, and Angular, helping improve system scalability, maintainability, and overall code quality by 30%.
- Worked closely with product owners, designers, and QA teams in an Agile or Scrum setup, contributing to sprint planning, daily stand-ups, and backlog grooming to consistently deliver features on time.

Lernov, Web Development Intern (Part-time), Bangalore, India.

July 2021 - August 2021

- Identified usability and navigation issues through user testing, redesigned key UI flows in Figma, and improved task success rates up to 30% while reducing page load time by 15% through targeted UX audits and design enhancements.
- Created and tested responsive layouts aligned with branding and achieved 90% stakeholder approval.

Sain Solutions, Website Developer and Designer (Intern), Bangalore, India.

Feb 2020 - May 2020

- Built and redesigned responsive retail interfaces using HTML5, CSS3, JavaScript, and Bootstrap, increasing user interaction by 50% and reduced bounce rate by 25% through user-driven UI improvements.
- Improved backend performance by 40% by optimizing data handling feature updates, while delivering clean maintainable code and collaborating with a distributed team using GitHub and Agile practices.

VOLUNTEER EXPERIENCE

9/11 National Memorial & Museum (Volunteer), New York.

Jan 2025 - Present

- Educated 1,000+ visitors monthly through storytelling, tours, and digital programs, fostering cultural understanding of complex historical events.
- Coordinate with visitor experience staff, educators, and operations teams to support structured programs and events.

UPchieve, STEM Computer Science (Volunteer), New York.

Sept 2024 - Dec 2025

- Mentored high school students in algorithms, data structures, and college applications, improving technical comprehension and college readiness.

PROJECTS

1. Task-flow Pro your AI-Powered Productivity Companion.

March 2025

- Improved team productivity up to 84% by streamlining workflows, introducing AI-assisted task prioritization, and improving collaboration efficiency.

2. Gift Genie.

February 2025

- Developed an interactive React-based recommendation engine, cutting gift search time by 70% through intelligent filters, increasing return visits by 50%.

3. Mood-Based Playlist Generator.

January 2025

- Created a JavaScript Natural Language Processing-based web app to auto-generate playlists based on user sentiment, improved user engagement by ~40% using sentiments-based personalization and iterative UI improvement's.

ACHIEVEMENTS

Research Paper, International Conference, REVA University, Bangalore, India.

May 2020

- Attended conference to display my project and research paper in Advances in Computing and Information Technology (IACIT-2020).
- Conducted research and presented findings on innovative computing techniques, contributing to the advancement of the field.
